

I'm a long haul trucker who depends on this type of information - traffic and weather. Not knowing the local stations of each city I travel to, I KNOW how dangerous it is to try to find the information I need by scanning local channels while driving. XM Radio provides this information with a touch of a button - which leads to safer roads not only for myself but others around me. To limit XM Radio's ability to provide traffic and weather information would be a great disservice to the motoring public.

I strenuously urge the FCC to reject the NAB's petition 04-160 and allow XM Radio to continue the programming I need and use on a daily basis.

Thank you,
Glenn Nichols
